Smart Pellet

AGENTIS INNOVATIONS

SMART PELLET

Smart Pellet is designed to optimize pellet mill throughput, improve pellet quality and reduce blockages and down time. All configurations of expanders, conditioners, fat spray at the die and pellet mills can be handled. User friendly interface with touch panel is used as the communicating unit.

FEATURES :

- Full Automatic start up
- Continuous change over function which allows a press bin to start the next product without delay
- Continuous Blockage and choke point detection
- Pre-set production parameters for every formulation, including steam settings, temperature and throughput Capacity to preload and store multiple formulations and their specific parameters

BENEFITS :

- Increase production throughput
- Reduce energy costs
- Improved pellet physical quality and consistency
- Extended life of pellet mill dies and rollers
