SMART PREMIX / HAND ADD

SMART PREMIX / SMART HAND ADD

Smart Premix/Hand Add is designed to remove the risks and errors associated with the manual preparation and weighing of premix ingredients, additives and medicines and the subsequent additions to the mixer.

FEATURES:

- Stand-alone system compatible with single or multiple preparation and hand dump stations

 Bar Code technology and Touchscreen displays
 - Integrated control with formulation and batching system
- Continuous recording of lot numbers and individual weights
- Hand addition identification and timing to mixer control.

BENEFITS:

- Eliminating concerns about cross contamination
- Accuracy of addition of ingredients and additives
- Reduce potential addition errors; human error, wastage of ingredients
- Precision and consistency of premix and feed formulated specifications
- Real time stock reconciliation and traceability
