

Smart Feedmill

SMART FEED MILL

A complete process control and data reporting system covering raw material receiving, grinding, batching, weighing, mixing, micro dosing, conditioning/pelleting, cooling, fat coating and finished product loading and packing. Designed to provide full traceability and mill capacity optimization.

FEATURES :

- Can be implemented in any existing mills or new builds
- Can be integrated and control any machinery and equipment
- Comprehensive and versatile reporting system
- Data can be easily integrated with management information systems
- Robust Traceability and Cross contamination control
- Multi batching capability
- Can be implemented as a scalable modular system

BENEFITS :

- Optimization of Feed Mill Production Capacity
- Provides Reports Necessary to Manage a Feed Mill Efficiently
- Optimize Manpower Resources and Reduce Human Errors
- Minimize Stock Discrepancies
- Meets International standards for Traceability and Food Safety
- Maximize Profits

Technological Solutions for You
